

Haas Factory Outlet

A Division of Haas Technical Center Pvt. Ltd.

To Whomsoever It May Concern

This is to declare that Master Chemical "TRIM" brand water soluble coolants have been tried on NEW HAAS Machines for more than 10 months in true production atmosphere and found that the coolants are machine friendly as no harm / damage was observed for seals, slide ways, tool holders etc.

Hence we at Haas Factory Outlet, Pune recommend Master Chemical "TRIM" Brand Water Soluble Coolant to be used on Haas machines subject to taking care of the other recommended conditions as per Machine Manual and by Coolant Supplier. However it must be noted that this is very important to maintain the pH & concentration of Coolant at all times.
